

How much did the same service change?

Compare high-frequency service steps across industries while keeping direction and absolute change visible.

Q1 2026 → Q2 2026 / same observation window / Before / after dumbbell

Detail · read each value

- Customer support / standard queue
- Course enrolment / evening cohort
- Clinic appointments / follow-up
- Store pickup / stock exception
- Marketing leads / qualification
- Team delivery / cycle tracking

5/6

Entities with a lower after value

- 01 Observation
Each entity is paired before and after. Segment length shows absolute change while position keeps the original values
- 02 Boundary
A before/after difference is not causal proof; check the mix of cases and the observation window.

Reading guide Hollow point = before; filled point = after. The axis keeps the original unit, and each segment connects one entity.
