

From 10,000 to 12,800: what made up the change?

Break one quarter of monthly active service cases into ordered signed changes while keeping the scope and net movement visible.

Q1 2026 → Q2 2026 / monthly active-case scope / Change waterfall

[Detail](#) · [read each value](#)

+2,800

Net change / cases / month

01 Observation

Closing = opening + every signed change. Each step continues from the previous cumulative value .

02 Boundary

This is a simulated reconciliation, not verified savings; check that one measure is not counted twice .

Reading guide One full tick = 500 cases / month; Floating steps show signed change; opening and closing bars start at zero, with dashed cumulative guides.
